

What You Need to Know about Fronto-Temporal Dementia

Fronto-Temporal Dementia, or FTD, refers to a diverse group of disorders that primarily affect the frontal and temporal lobes of the brain — the areas generally associated with personality, behavior and language. These areas play a significant role in decision-making, impulse control, and emotion.

In this session, you will learn:

- Why diagnosing Fronto-Temporal Dementia can be difficult
- Brain changes that occur in frontal and temporal lobes in FTD
- Care challenges that are common in each sub-type of FTD
- Best practices to care for those living with Fronto-Temporal Dementia

Let our Dementia Expert “open the door”
to a better understanding of dementia with a
60-minute or 90-minute session on this topic!

Lori Dierolf, President of Open Door Training & Development, holds a Bachelor’s degree in Psychology and has been leading staff education on dementia topics for over 20 years. She is a Personal Care Home Administrator, as well as a Certified Dementia Practitioner, a Certified Alzheimer’s Disease & Dementia Care Trainer, and a Certified Aging & Alzheimer’s Educator.

Lori’s sense of humor and real-life examples from her years of experience in long-term care are reasons attendees consistently rate her sessions with 5 Stars!!! Read their testimonials at www.OpenDoorTraining.net!!
